RFID Intelligent Cabinet

Empower Your Operations: Intelligent Device Security & Management Solution

A Revolution in Device Management

Introducing the MEFERI Secured Intelligent Cabinet IC150: the future of efficient, secure, and smart mobile device storage and management tailored for modern enterprises.

Optimal Storage and Charging

Ensure your mobile computers are not only stored securely but are also consistently ready for use. With the IC150, devices are cradled in specialized docks, guaranteeing they're charged and updated simultaneously

Cost & Time Efficiency

With devices always charged and monitored, enterprises save significantly on service costs. By tracking device usage, you safeguard against fraud and reduce device damages.

Unparalleled Software Features

User Authorization & Identification:

Employees can only access the cabinet after a stringent three-tiered verification:
• NFC card   • Barcode   • Fingerprint

Seamless Cloud Integration:

Every interaction with the cabinet is recorded, from who accessed it to when, ensuring complete transparency and efficient analytics. Data seamlessly syncs to our cloud platform or your local infrastructure.

Smart RFID Identification:

Our state-of-the-art RFID tech, paired with signal shielding, ensures only actions inside the cabinet are tracked. This minimizes false data and ensures accurate tracking of each device's status.

Solution Deployment

Choose how you want to deploy the centralized software platform:

• On-Premises: Securely within your enterprise's infrastructure.
• Cloud-Based: Accessible through any browser, reducing the need for in-house server maintenance.

» Intuitive Software Interaction

On approaching the sensor screen:

Select Task:

- Begin a work shift by taking a device.
- End a work shift by returning a device.
- Notify of a damaged device. Alerts can be automatically sent to your service partner, initiating repairs without delay.

» Additional Camera Feature

Ensure device integrity with our optional camera feature: Before returning, employees must photograph the device from various angles. This photographic evidence offers a visual history of device conditions over time, holding employees accountable and ensuring careful handling.

» Why Choose MEFERI IC150?

- **Automated Device Management:** Eradicate manual logs of device issuance, reducing time wastage and human errors.
- **Streamlined Service Processes:** Direct communication with service centers means no manual reporting of device damages.
- **Theft Prevention:** Complete transparency on device movement ensures thefts are virtually eliminated.
- **Employee Accountability:** Traceable records of device handling encourage employees to treat equipment responsibly.
- **In-depth Analytics:** Comprehensive data collection offers insights for process optimization.

» Customizable Configurations

Whether you're a budding start-up or an expansive enterprise, we've got a configuration that suits your needs:

- **Small Size:** 3 shelves with 5 cradles per shelf (15 devices)
- **Middle Size:** 6 shelves with 10 cradles per shelf (60 devices)
- **Large Size:** 9 shelves with 15 cradles per shelf (135 devices)

Custom sizes are available upon request, ensuring a perfect fit for every business requirement.

For a future where your mobile devices are always charged, tracked, and ready, choose the **MEFERI Secured Intelligent Cabinet IC150**. Bringing efficiency, security, and innovation to the heart of your operations.
