

OmniSoftware Suite

Unlock the Full Potential of MEFERI Devices with OmniSoftware Suite

OmniSoftware Suite delivers powerful tools to enhance device security, optimize workflows, improve data accuracy, and ensure full control over enterprise operations—tailored for every business need

Unmatched Security and Reliability

Protect your operations with enterprise-grade security solutions. OmniSoftware Suite includes automated security updates, advanced encryption, and remote management capabilities. Tools like GuardForce ensure devices remain protected with the latest patches, while compliance enforcement minimizes vulnerabilities and maintains operational integrity.

Optimized Device Performance and Customization

Tailor MEFERI devices to meet unique business workflows. From system adjustments with CustomDroid to printing management with MePrint, OmniSoftware Suite provides tools to fine-tune performance, simplify processes, and unlock new capabilities for seamless operations.

Enhanced Data Collection and Accuracy

Maximize data efficiency and precision with advanced tools for barcode scanning and data transfer. ScanEdge and MeWedge customize scanning settings for specific tasks, improving accuracy across applications. With MeSynch, settings are transferred effortlessly across multiple devices, ensuring consistency and faster deployment.

Centralized Control and Efficient Management

Take full control of device fleets with centralized tools for configuration and oversight. Solutions like MeMaster streamline mass configurations, while OEM Config enables remote management of settings, policies, and applications. This ensures consistent performance across devices and reduces IT workload.

Main Features

Empower Your Enterprise. Optimize Your Operations.

With OmniSoftware Suite, MEFERI devices deliver exceptional performance, security, and adaptability—driving efficiency and innovation across industries.

GuardForce

GuardForce Android provides regular updates with the latest security patches.

Developed by: MEFERI

ScanEdge

Configures the settings of the scanning head parameters.

Developed by: MEFERI

MeWedge

Configures a set of scanning head parameters for each application.

Developed by: MEFERI

CustomDroid

Installing your custom functions for the Android OS.

Developed by: MEFERI

MeBrowser

Embodiment of simplicity and efficiency in managing internet traffic on work devices.

Developed by: MEFERI

MeLauncher

Simple tool for controlling and restricting the operation of applications or functions on MEFERI devices.

Developed by: MEFERI

MeMaster

Mass management and configuration of MEFERI devices based on the Android operating system.

Developed by: MEFERI

MeRDP

Remote desktop solution for managing PCs through a mobile device.

Developed by: MEFERI

ALocker

MeScreen
(Part of Solution: MeMobilityDesk).

Developed by: MEFERI

KeyReMap

Creates and adjusts the keyboard to your requirements.

Developed by: MEFERI

ScanWizard

Configure different scan heads, set scan header parameters.

Developed by: MEFERI

MeEasyPair

NFC OneTouch Easy Pair—Pairing the ME10 and MS300R in one touch, instantly.

Developed by: MEFERI

MeSynch

Enables to copy device settings to other devices with just one scan of a barcode.

Developed by: MEFERI

MeTOF

See the Unseen. Rethink objects Measurement.

Developed by: MEFERI

MePrint

MePrint Utility provides you with complete control over your printer settings, allowing you to easily configure your printer.

Developed by: MEFERI

WinDriver

Efficient Label Printing Starts with the Right Windows Driver.

Developed by: MEFERI

MeHeating

Control and adjustment of heating settings on industrial terminals and data collection tablets.

Developed by: MEFERI

OEMConfig

Seamlessly manage and customize your enterprise Android devices remotely, ensuring efficient deployment and compliance.

Developed by: MEFERI

Learn More About OmniSoftware Suite

Discover OmniSoftware Suite, advanced tools for security, workflow optimization, and centralized management, designed to maximize the potential of MEFERI devices. Take full control of your enterprise solutions with ease.
