

# Shadowwalk MDM/EMM

## Enterprise Mobility and Device Management Solutions

The all-in-one platform for securing, managing, and optimizing MEFERI Android devices with precision and efficiency

### Centralized Device Management

Shadowwalk streamlines enterprise mobility with advanced remote control, real-time diagnostics, and monitoring. Update device settings, deploy apps, and manage fleets effortlessly from a single console, minimizing downtime and improving efficiency.

### Seamless OTA Firmware Updates

Keep your MEFERI devices secure and up-to-date with Over-The-Air (OTA) firmware updates. Manage and apply system updates centrally, ensuring all devices run the latest Android OS versions and security patches without manual intervention.

### Effortless Enrollment and Setup

Accelerate deployment with QR Code-based Enrollment, enabling out-of-the-box configuration. Shadowwalk predefines all essential parameters, including Wi-Fi settings, security policies, and app installations, ensuring devices are ready to use instantly.

### Advanced Security and Compliance

Protect corporate data with enterprise-grade features like Kiosk Mode, geo-restrictions, and Data Loss Prevention (DLP). Automate compliance enforcement and remotely wipe or lock devices to safeguard sensitive information.

# Main Features

## MDM: Redefining Enterprise Device Oversight

Scalable, Secure, and Intelligent Solutions for Mobile Device Management

 System Management

 Remote Device Management

 Remote Device Diagnostics

 Apps Management (Google Play Integrated)

 Kiosk Enterprise Mode

 Advanced Security Management

 Expanded Flexible Policies

 Remote Support Service

 Visual Dashboard

 GEO Restrictions

 Hybrid Activation of Licenses

 Mobile Application Management (MAM)

## Shadowwalk Zero Downtime Enroll: Ready Right out of the Box

With Shadowwalk Zero Downtime Enroll, MEFERI devices are operational straight out of the box. A single QR code scan, pre-configured in the Shadowwalk console, instantly applies all settings, including:

- Optimized system configurations tailored to specific workflows.
- Immediate connectivity via Wi-Fi, 4G LTE, 5G, Bluetooth, and NFC.
- Preselected applications, updates, and security policies automatically installed and enforced.
- Streamlined device grouping for simplified fleet management.

Organizations control every detail in Shadowwalk, defining how devices are configured and deployed. This eliminates manual setup, reduces IT workload, and ensures rapid deployment, saving time and costs while boosting operational efficiency.

## EMM: Empowering Enterprise Mobility

 Mobile Application Management (MAM)

 Mobile Identity Management (MIM)

 Data Loss Prevention (DLP)

 Managed Google Play Store Customization

 Customizable Device Setup UX

 Silent App Distribution

 Compliance Enforcement

 Remote Control and Reboot
